

TECHNICAL DATA SHEET

Code	MAT224
Product	CDK - Tapered Vacuum Mattress
Includes:	Tapered vacuum mattress

Vacuum mattresses are devices for immobilizing patients with suspected traumatic injuries. The decompression system allows for varying degrees of immobilization, from the firmest, which promotes proper patient positioning, to softer immobilizations, which attenuate the low-frequency vibrations typical of transport in emergency vehicles. Load capacity 150 kg.

Specific features

Robust, non-absorbent and self-extinguishing fabric
Perimeter rope with soft handles for easy transport

Tapered shape to improve patient adherence 9 handles make transport easier and allow for better adaptation in various rescue scenarios

Radiotransparency allows preliminary diagnoses to be made using X-rays

Technical data

Length	2150 ± 30 mm
Length	900 ± 30 mm
Number of handles	9
Materials	Al, PP, PVC, Nylon
Weight	4.1 ± 0.3 kg

Class I MD according to Dir. 93/42/EEC

CDK - DEPR. MATTRESS

TAPERED ORANGE/GREY

MAT224

CND Classification

V0804
