

# DATASHEET

Code	CAV463
Product name.	Futura Box

FEATURES

Size (L x P x H): 250 x190x90 mm

Case made of Compound PP/ Wood Flour (WPC-Wood Plastic Compound) with vegetable charges between 30-40%; equipped with wall support, transport handle and closure with 2 rotating clips.

Available colors

## **TECHNICAL DATA SHEET**

## PLASTIC WOOD COMPOUND PP30 SCD

### General information:

Compound PP/Wood Flour (WPC-Wood Plastic Compound) containing between 30 % and 40 % of wood fillers.

High degree of fluidity for injection molding of parts with thicknesses even less than 3 mm; excellent overall balance of mechanical and thermal properties, high impact resistance.

### Suggested conditions:

For drying process, it is recommended to keep the material at 100  $^{\circ}$ C for at least 7 hours and subsequently to dehumidify it for 7 hours. For a better aesthetic appearance the moisture content before the molding process must be less than 0.05 %, in order to avoid surface grains and flow marks due to possible residual moisture.

Molding suggested conditions: temperature of the press head at about 160 °C, temperature near the nozzle at 175/180 °C, die temperature at 40 - 60 ° C, medium – high injection speed; it is recommended to maintain the temperature of the screw around 160/165 °C because the frictioning material may overheat. Any temperature higher than 190/200 °C could cause degradation, darkening or combustion of the wood flour.
